DETAILED ACTION

Claims 30-75 are presented for examination.

The response to the restriction requirement of October 11, 2006 has been received and entered.

Applicant elects the species of rapamycin and wet form of macular degeneration for examination purpose.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Mollison (U.S. Patent 6,015,815). Mollison teaches the use of rapamycin analogs in combination with an alcohol such as ethanol and propylene glycol for the treatment of wet form of macular degeneration. See column 1, lines 15-25, column 9, lines 65-67. The claimed ophthalmic mode of administration is taught in column 14, lines 4-17. The above reference makes clear that the claimed composition and method of use is old and well known.
